

# Meridian Diagnostics & Research Centre

Clinical Pathology | Biochemistry | Immunoassay  
14 Park Circus Road, Kolkata 700017 | Ph: 033 4000 1200  
NABL accredited (sample document)

|              |                                   |            |                       |
|--------------|-----------------------------------|------------|-----------------------|
| Patient name | Rahul Sharma                      | Patient ID | MP-2026-04871         |
| Age / Sex    | 54 Years / Male                   | Collected  | 12 Aug 2026, 07:40 AM |
| Referred by  | Dr. Amit Kumar Dey, MD (Medicine) | Received   | 12 Aug 2026, 09:15 AM |
| Specimen     | Sodium Fluoride Plasma            | Reported   | 12 Aug 2026, 04:20 PM |

## BLOOD SUGAR - POST PRANDIAL (2 HOURS)

Method: Hexokinase / G-6-PDH

| INVESTIGATION                 | RESULT | UNIT  | REFERENCE INTERVAL |
|-------------------------------|--------|-------|--------------------|
| Glucose, Post Prandial (PPBS) | 236 H  | mg/dL | < 140              |
| Glucose, Fasting (same draw)  | 148 H  | mg/dL | 70 - 100           |

### SUMMARY & INTERPRETATION

#### Outside the reference interval (2)

|                                                                                                                                                           |                          |
|-----------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------------|
| <b>Glucose, Post Prandial (PPBS) 236 mg/dL</b><br>Two-hour post-meal glucose is well above target, indicating the meal-time rise is not being controlled. | Reference < 140 mg/dL    |
| <b>Glucose, Fasting (same draw) 148 mg/dL</b><br>Consistent with the fasting sample reported separately.                                                  | Reference 70 - 100 mg/dL |

Dr. S. Venkatesan, MD (Pathology)  
Consultant Pathologist | Reg. WBMC-48219
