

Meridian Diagnostics & Research Centre

Clinical Pathology | Biochemistry | Immunoassay
14 Park Circus Road, Kolkata 700017 | Ph: 033 4000 1200
NABL accredited (sample document)

Patient name	Rahul Sharma	Patient ID	MP-2026-04871
Age / Sex	54 Years / Male	Collected	12 Aug 2026, 07:40 AM
Referred by	Dr. Amit Kumar Dey, MD (Medicine)	Received	12 Aug 2026, 09:15 AM
Specimen	Serum (12 hour fasting)	Reported	12 Aug 2026, 04:20 PM

LIPID PROFILE, SERUM

Method: Enzymatic, colorimetric | LDL calculated (Friedewald)

INVESTIGATION	RESULT	UNIT	REFERENCE INTERVAL
MEASURED			
Total Cholesterol	224 H	mg/dL	< 200
Triglycerides	218 H	mg/dL	< 150
HDL Cholesterol	36 L	mg/dL	> 40
CALCULATED			
LDL Cholesterol	144.4 H	mg/dL	< 100
VLDL Cholesterol	43.6 H	mg/dL	10 - 30
Non-HDL Cholesterol	188 H	mg/dL	< 130
Total Cholesterol / HDL Ratio	6.22 H	ratio	< 4.5

SUMMARY & INTERPRETATION

Outside the reference interval (7)

Total Cholesterol 224 mg/dL Above the desirable level.	Reference < 200 mg/dL
Triglycerides 218 mg/dL Raised. Triglycerides commonly rise when blood sugar is poorly controlled and fall again as control improves.	Reference < 150 mg/dL
HDL Cholesterol 36 mg/dL Low. HDL below 40 mg/dL in men adds to cardiovascular risk.	Reference > 40 mg/dL
LDL Cholesterol 144.4 mg/dL Above the target for someone with diabetes, where an LDL under 100 mg/dL is usually aimed for, and under 70 mg/dL if there is established heart disease.	Reference < 100 mg/dL
VLDL Cholesterol 43.6 mg/dL Raised, in line with the triglycerides.	Reference 10 - 30 mg/dL

Rahul Sharma | MP-2026-04871 | LIPID PROFILE, SERUM (continued)

Non-HDL Cholesterol 188 mg/dL

Raised. This is the total of all the cholesterol carried by particles that contribute to plaque.

Reference < 130 mg/dL

Total Cholesterol / HDL Ratio 6.22 ratio

Above the desirable ratio.

Reference < 4.5 ratio

Dr. S. Venkatesan, MD (Pathology)
